

Tap into Your Organization's Creativity, Experience and Success

An Effective Way to Document and Share Best Practices

Who Needs Dploy Knowledge?

Any department that wants to standardize and share its best practices more efficiently, including:

- > Manufacturing and Operations
- > Training
- > Engineering
- > Sales and Marketing
- > Human Resources
- > Quality
- > Research
- > Service Providers

Dploy Knowledge Benefits

- > Intuitive, easy to use
- > Affordable, subscription-based pricing
- > Scalable – use for a single department, or for an entire company
- > Web-based – no need for additional IT support or capital allocation
- > Replaces cumbersome shared drives and repetitive, costly retraining

Dploy™ Knowledge

Search, Select and Share Best Practices Efficiently and Effectively

Sharing best practices is key to continuous improvement. But in many organizations, this valuable knowledge is difficult for employees to locate and access. As a consequence, best practices are often lost, resulting in duplication of effort, reduced productivity and repeated mistakes.

Dploy Knowledge solves this problem through an intuitive, easy-to-use database that standardizes and facilitates the sharing of best practices. Dploy Knowledge empowers your lean organization to use shared knowledge to continuously improve results, stay on course and directly impact your ability to execute more effectively.

A powerful, necessary solution for organizations committed to continuous improvement

Ensures best practices are standardized, shared and adhered to • Saves countless hours of retraining • Avoids costly mistakes

Find what you need fast.

From the home page, you can search, manage postings, upload new best practice sharing, post news and see what's new. It's completely customizable, always up-to-date and always relevant.

Powerful search - thinks like you do.

Intuitive, simple-to-use search capability works just like the web. Search by keywords, categories or customizable filters. Because people think differently, Dploy Knowledge provides multiple ways to search and locate key information. Knowledge is easier to find, share and use.

Robust search. Tailored results.

Search on single or multiple terms to access shared knowledge throughout your organization.

Star rating system lets users provide feedback on each shared post.

Search yields the postings most directly related to your keyword topics.

The gray box provides a summary of all relevant postings by subcategory so you can easily refine your search.

Completely customizable. Minimal administration.

Management is a cinch. A designated administrator can customize each filter to fit your organization. Easily create customized intuitive search filters.

Easily add or edit permissions to expand or restrict views.

Consistently capture information with easy templates.

Ensure a consistent approach for capturing the important details by establishing and applying templates for the posting process.

Quick and easy reports.

Use reports to encourage contributions, participation and ownership. You'll easily understand how your organization utilizes the database - who's accessing it, what the most popular filters and downloads are, and more. Drive improvement and create a sense of community.

Testimonial

"We use Dploy Knowledge to share learning and best practices across all our locations. It lets us easily see what others are doing, so we learn from each other about what works, and avoid recreating projects that others have already tackled. It saves us time, helps us advance more rapidly and sustain results, and it supports our goal of continuous improvement."

– Ralph Hobson
Senior VEA Engineer / Lean Promotion Officer
Progress Lighting, a subsidiary of Hubbell, Inc.

Dploy™ Knowledge

24/7 Access to Shared Knowledge Across Your Entire Organization

Dploy Knowledge is a fully hosted, web-based, real-time solution. It puts everyone on the same platform across multiple sites, across companies, across the globe. Updates are instant and control is immediate, 24 hours a day, 365 days a year.

State-of-the-Art Security

TBM believes that security is more than passwords and firewalls. We take a comprehensive approach to the many components that secure your assets – your data, the application and the hardware housing. Our hosting includes complete network security with full firewall protection; SOX/HIPPA and other regulatory compliance with full documentation. Equally important, we are positioned to support clients of any size with immediate scalability and guaranteed uptime.

Our Core Focus: Continuous Improvement

Dploy Knowledge is part of a suite of solutions specifically for lean organizations focused on continuous improvement. We also offer Dploy Strategy, to more effectively manage and implement strategic plans, and Dploy KPI, to track and measure key performance indicators easily and efficiently.

All three solutions were developed by TBM, nationally recognized consultants with extensive senior-level experience at leading high-performance organizations. We're grounded in the Toyota Production System and specialize in time-based LeanSigma® principles for discrete manufacturers, process companies and service firms worldwide.

Our goal:

Improve your business performance and help you translate it into sustainable sales and earnings growth.
